PROFESSIONAL SUMMARY

Computer Science engineer (B.E., 2026) with two internships (Python Developer, Machine Learning) and hands-on projects across backend development, data science and AI. Builds REST APIs with Flask, Django web apps, and classification models with scikit-learn, and ships them as working apps. Course training in Generative AI, LLMs, AI agents (LangChain, LangGraph), PyTorch and the OpenAI API. Seeking an entry-level Python Developer, AI/ML or Data Science role.

SKILLS

Python & Backend: Python, Flask, Django, REST APIs, Streamlit, HTML, CSS, SQL, Debugging, Web Scraping (Requests, BeautifulSoup), Git & GitHub

Data Science: Pandas, NumPy, Matplotlib, EDA, Data Cleaning, Data Preprocessing, Feature Engineering, Model Evaluation

Machine Learning: Scikit-learn, Logistic Regression, Decision Tree, Random Forest, KNN, K-Means Clustering, Classification

Gen AI & Deep Learning (coursework): Generative AI, LLMs, LangChain, LangGraph, AI Agents (Agentic AI), Deep Learning, PyTorch, OpenAI API, Hugging Face Transformers (BART / T5), NLP

Databases, Tools & Libraries: Supabase, SQLite, pdfplumber, face_recognition (dlib), Resemblyzer, librosa, Jupyter Notebook, VS Code, Vercel

EDUCATION

Bachelor of Engineering – Computer Science & Engineering 2022 – 2026
Sri Revana Siddeshwara Institute of Technology, Bengaluru CGPA: 8.06 / 10

INTERNSHIPS

Python Developer Intern – Elevate Labs, Bengaluru Aug 2026 – Oct 2026

- Built Python applications from written requirements: a Flask REST API, a web scraper (Requests, BeautifulSoup), task-automation tools and command-line utilities.
- Debugged and fixed issues while delivering working solutions; recognised as **Best Performer** for quality and consistency of deliverables.

Machine Learning Intern – Karunadu Technologies Pvt. Ltd., Bengaluru Feb 2026 – May 2026

- Built three end-to-end ML web apps in Django (Resume Analyzer, Crop Recommendation, Cinnamon Quality Classification) under mentor guidance.
- Cleaned and preprocessed datasets, trained and compared Logistic Regression, Decision Tree, Random Forest and KNN, and served predictions through web forms and dashboards.

PROJECTS

Intelligent AI Attendance System GitHub | Landing page
Python, Streamlit, Supabase, Face Recognition, Resemblyzer

- Extended the Apna College AI Attendance project into an app where teachers manage subjects and students and mark attendance by **face and voice recognition**; records stored in Supabase with analytics and CSV export.
- Used pretrained models for recognition (face embeddings from face_recognition/dlib, speaker embeddings from Resemblyzer, audio processing with librosa); built and deployed a separate Flask landing page on Vercel.

REST API Development using Flask GitHub
Python, Flask, REST API, JSON

- Built a REST API with GET, POST, PUT and DELETE endpoints (/users) to list, add, update and delete user data, with JSON request and response handling and an in-memory data store.

News Headlines Scraper GitHub
Python, Requests, BeautifulSoup

- Built a web scraper that fetches a public news page, parses the headline tags, removes duplicate headlines and saves the results to a text file.

Crop Recommendation System GitHub

Python, Scikit-learn, Pandas, Django

- Trained and compared four classifiers for multi-class crop prediction from soil nutrient and climate data; **Random Forest reached 99.32% test accuracy** (Decision Tree 98.64%, KNN 97.05%, Logistic Regression 94.55%).
- Served the top three crop predictions with confidence scores through a Django dashboard.

Cinnamon Quality Classification GitHub

Python, Scikit-learn, Pandas, Django

- Trained Random Forest, KNN, Logistic Regression and Decision Tree on 60 balanced chemical-property samples; Random Forest and KNN scored 100% and the other two 91.67% on the test split (small dataset).
- Deployed an interactive Django web form for quality predictions.

CERTIFICATIONS

- Python Developer Internship, Best Performer – Elevate Labs, Bengaluru (Aug – Oct 2026)
- AI and Machine Learning – Prime 2.0, Apna College (Mar 2026): Machine Learning, Generative AI, LLMs, Agentic AI (LangChain, LangGraph), OpenAI
- Python Programming and Applied Machine Learning – Karunadu Technologies Pvt. Ltd. (Feb – May 2026)
